Journal of Testing and Evaluation
Table of Contents, Volume 14
1986

No. 1, January

A Modified Metallographic Method to Detect Sensitization in Type 316 Stainless Steel—NATARAJAN PARVATHAVARTHINI, RAVIN K. DAYAL, AND JUTTU B. GNANAMOORTHY 3
Estimation of Fatigue Life at Elevated Temperature of Electron Beam Weldments of Alloy 718—JUICHI FUKAKURA AND TADAO MORI 7
Erosion of Phosphor Bronze under Cavitation Attack in a Mineral Oil—B. C. S. RAO AND D. H. BUCKLEY 13
Evaluation of the Effect of Contact-Time When Measuring Floor Slip Resistance—CHARLES H. IRVINE 19
Erosion by Solid-Particle Impacts: A Testing Update—FLOYD W. WOOD 23
A Rapid Test for Asphalt Content of Bituminous Mixtures—JORGE JAVIER MARTINEZ CHAVEZ AND DOUGLAS N. WINSLOW 28
Use of X-Ray Diffraction with the Gaussian Curve Method to Evaluate the Hardening in Quenched Steels—MASANORI KURITA, IKUO IHARA, MASASHI SHINBO, AND HIDEO KOGUCHI 33
Fracture Mechanics Evaluation of Irradiation Embrittlement in Reactor Vessel Steels Based on the Rate Process Concept—FUMIO NOGATA AND HIDEAKI TAKAHASHI 40
Determination of Fracture Toughness by CTOD Resistance Curve Method—SUSIL K. PUTATUNDA 49

No. 2, March

References and Conference Proceedings Towards the Understanding of Fracture Mechanics—PIR M. TOOR AND C. MICHAEL HUDSON 61
Determination of Fracture Toughness for Brittle Nonmetallic Materials at the Subcritical Crack Growth Stage—V. P. NAUMENKO 76
Interpretive Report on the Sensitization of Type 304 Stainless Steel—EDWARD A. LORIA 81
An Empirical Model for Predicting Performance of Fire-Resistive Coatings in Wood Construction—ROBERT H. WHITE 97
Analysis of Service Failures in Thermoplastic Pressure Piping Water Systems—FRANK W. REINHART AND FRANK J. FURNO 109
Direct Modeling of Concrete Block Masonry Under Shear and In-Plane Tension—AHMAD A. HAMID AND BECHARA E. ABBOUD 112
A Better Way to Present Results from a Least-Squares Fit to Experimental Data: An Example from Microhardness Testing—PHILIP M. SARGENT 122
Simple Analysis of Gluconate in Cleaner—ROBERT HWANG 128

No. 3, May

A Preliminary Examination of the Laboratory Sheen Test—MAURICE (MO) JONES 133
Factors Affecting Results of Chemotaxis Inhibition Tests with Protozoa—SHARON G. BERK AND BRIDGET A. MILLS 140
Fatigue Crack Growth Threshold and Crack Opening of a Mild Steel—M. T. YU, T. H. TOPPER, D. L. DuQUESNAY, AND M. A. POMPETZKI 145
A Personal Computer Based Thermal-Mechanical Fatigue Test System—DANA M. ELZEY, ARNIE T. HENRY, AND ALLAN F. ANDERSON 152
Effect of Bearing Plate Properties on the Behavior of Block Masonry Prisms under Axial Compression—AHMAD A. HAMID AND AMBROSE O. CHUKWUNENYE 156
Chromium Conservation in Stainless Steel—J. J. HEGER 160
Measurement of Granule Coverage on Bituminous Roofing Surfaces—O. DUTT 163
Wastewater Sludge Treatment and Utilization in the U.S.S.R.—S. V. YAKOVLEV AND E. V. DVINSKYCH 168

No. 4, July

Poisson's Ratio As Determined for Elastic and Plastic Deformation and for Monotonic and Cyclic Loading—Part I: Critical Review—KLAUS RAHKA AND CAMPBELL LAIRD 173
An Evaluation of Dynamic Fracture Toughness of Type A508 Class 3 Steel—EISUKE FUJII, YUZURU SAKAI, AND YOSHIO ANDO 181
R-Curve Round-Robin Program for ASTM Recommended Practice for *R*-Curve Determination (E 561)—HUGH S. PEARSON AND DONALD E. McCABE 191
Development of a Constant-*K* Specimen for Materials Testing—PETER HUCULAK 200
Determination of Calibration Constants for Hole Drilling Technique Using Special Strain Gage Rosette—G. JAYARAMA RAO, K. RAVI SANKAR, AND R. NARAYANAN 207
Effect of Axial Compression—LASZLO J. JAVORIK 213
Technical Note: Evaluation of Plane-Stress Fracture Testing Methods—H.S. PEARSON 224

No. 5, September

Investigation of Dynamic J_{Id} for Alloy Steel Weldments Using the Split Hopkinson Bar—M. N. BASSIM, M. R. BAYOUMI, T. R. HSU, AND J. R. MATTHEWS 229
A Microcomputer-Based System for the High-Speed Compression Test by the Split Hopkinson Pressure Bar Technique—T. YOKOYAMA AND K. KISHIDA 236
In Situ Dynamic Estimates of the Equation of State for Alluvium for Intermediate Pressures and High Rates—ERIC J. RINEHART 243
An Ultrasonic Method for Determining Axial Stress in Bolts—GEORGE C. JOHNSON, ALBERT C. HOLT, AND BRUCE CUNNINGHAM 253
Bibliography on Clean Glass: Supplement I—D. E. CAMPBELL AND P. B. ADAMS 260
Effect of Fiber Loss by Carding on Average Fiber Diameter of Core Samples of Grease Wool—R. H. STOBART AND E. J. MORRISON 266
Technical Note: Reference Samples for the Evaluation of *Salmonella* Isolation Methods—HARRY J. BECKERS 269
Technical Note: Modified Lever System for Constant-Stress Compressive Creep Machine—F. DOBEŠ, O. ZVĚŘINA, AND J. ČADEK 271

No. 6, November

Cyclic Stress and Diametral Strain Response During High Strain Amplitude Fatigue of a 1Cr-1.3Mo-0.3V Bainitic Rotor Steel at Elevated Temperature—Part II—KLAUS A. RAHKA AND CAMPBELL LAIRD 277
On the Determination of Crack Initiation Using Standard Test Methods—DIETER HELLMANN AND KARL-HEINZ SCHWALBE 292
Using an Impact Device with Sliding Drop Collar for *In Situ* Evaluation of Compressive Strength of Insulating Cellular Concrete—ZVI REICHVERGER 298
A Computerized Test System for Thermal-Mechanical Fatigue Crack Growth—N. MARCHAND AND R. M. PELLOUX 303
A Method for Determining Conservative Fatigue Threshold While Avoiding Crack Closure—SABURO MATSUOKA, ETSUO TAKEUCHI, MICHIO KOSUGE, MASUO SHIMODAIRA, AKIHIKO OHTA, AND SATOSHI NISHIJIMA 312
Precision Testing of Standardized Microbiological Methods—HARRY J. BECKERS 318
A Suggested Role of Combustion Toxicity in Fire Risk Assessment—GEORGE V. ALEXEEFF AND STEVEN C. PACKHAM 321
Linear Elastic Fracture Mechanics Applied to an Adhesive Spar—Wingskin Joint—PER A. GRADIN AND SÖREN NILSSON 326
